MPL Game & Cricket Guide

To expand our business, we hope to ethically hack some illegal websites so that when the users get on the website, it will automatically redirect them to our website. We are looking for long-term cooperation. Chat me if you are interested and we promise we are only looking for white hat hacking.

1. Application have 2 screen only 2. Once user open the app user must to login with username and password, which must to authenticate with server database.
3. user must able to change the password.
4. when user logged in then app must talk to server and check database file if mismatch it should be download the file (file have json database only two tag "partnumber" and "partname")
5. after the there should be one button start task & End Task.
6. after clicking the button user must able to scan the barcode of any item then app will validate it with database.
7. If due to any reason barcode not get scanned then user must able to enter the number manually.
8. after scan or added manually user will enter the quantity and add to list.
9. user must able to add mult... Hello there! I'm a game designer with some coding skills. I've been working on a hypercasual game and I've already made a prototype. The next step of the project is to set up the server logic so I can implement the onboarding phase and collect player info (just a anonymous logic plus a display name) Then I'd need to set up the economy management so I can create a progression plan and items to purchase. I provide all the interfaces and front end already implemented on Unity. Download the prototype here:.....search field where you put company ID (KRS) I want to scrap ids from 0000606070 to 000923690 after searching there is detailed view of company in that view you need to select "Roczne sprawozdanie finansowe" from option field after that the table with company documents will refresh the task is to download all the documents the last column called "Akcje" has "Pokaż szczegóły", after clicking that you will see additional layer with details of document and there is button "Pobierz dokumenty" - to download the document the documents should be stored in folders by company folder should have name by pattern : "0000606070 MULTI-CORP SPÓŁKA Z OGRANICZONĄ ODPOWIEDZIALNOŚCIĄ" and files in that folder should have nam.....Attached is the functionalities that the control panel will have to control. Need an experienced team to develop a dating app development language that is already advanced. I already have: 70% advanced design. Completed 50% Features APK: The following features are completed in the website control panel and mobile apps Login , Register , Login Socila , Password Fergat , filters , user cards , likes , dislikes , albums , hidden album , view profile , rating rating , report user , matches , diary , profile stats , stories , audio call , hits chat, video call, mail notification, and chat notification such as mail hist... Project Deadline: Within 1 Day Project Budget: \$75 Project Type: PHP & JS Script Project Overview: Simple PHP script to allow a user to bulk upload images to be resized and renamed based on a list of new file names, then automatically downloaded as a zip file containing the images. Script Process FL...line in the "File Names" - User drag & drop images into the file upload box - Uploaded images show in the "Image List" column - User presses "Process" button - Real-time process status of each image - Script check the number of file names is EQUAL to the number of uploaded images - Script resizes each image & renames each image - Automatically download the zip file with all the new imag.....to build an application which can be installed and operated on a Windows OS by a user with basic IT knowledge. Specifications My requirements are as follows: 1. The application must work on Windows 10 2. The application must be installed on the Users desktop, with an icon of an alarm clock 3. The application installation process must be user friendly. The only input needed from the user is to download the installation file and run the installation file. The installation process must occur automatically. 4. The application must have a UI that looks like an alarm clock (either digital or analog). This can be very basic but at a minimum, must allow the user to: a. Set a location or time zone b. Display the current time based on the location or time zone selected c. Set a future t... Client: This PHP file is used to send available commands to SSH when the user provides full SSH information and enters the correct key available from the server. When the script is done running it will return the information in the txt file. I need to display it and let the user download it. Servers: - Generate a key for Client to use - One key can only be used once My maximum budget is 20\$, thanks. hello guys i bought a script in envato and i need to make some change in this script first of all this is a cryptocurrency trading script and we need to add OTC on this have all item that we n...main page of the website and sample of onramp can be checked in this website - 4-we have on-app fiat payment with API of and need to make some change with 5-we need to double-check security of the script(we will release the money of this project after make sure of the security of the script) 6- 2fa cant be change by the admin and need to add to the admin panel, you can download and check the script via this link please name the price and time of change after you check the script Add logo and text to eps photos and remove unnecessary text. Not all photos have text only maybe 5 or so rest are photos that need to add logo and text. These are ad photos for facebook and instagram. Make them look appealing and for viewers to download app. Its not big work so i will do 5 dollars for each photo edit. Will make it 300 dollars. Looking for an agency or freelancer who has experience in developing fantasy sports platform like Dream11. We'll provide you the UI design. From writing code to deploying code to server you have to do. Features List User App - Login/Registration - with phone no and truecaller - User Profile - Create Team - Advanced Search - Details on Player - Event Details - Scoreboard - Create or Join League - Team Management - Rewards - Notifications - eWallet - Join Contest Admin Panel - Admin Dashboard - User Account Management - Report Management - Customer Support - View Earnings - Managing Contest - Role-Based Dashboard - Reward Management - Real-Time Analytics - Game Management Project Dating priority for those who already have experience with this type of project Willingness to work dedicated Application (Reactive language. Control panel and website (Language: asp.net I already have: 70% advanced design. Completed 50% Features APK: The following features are completed in the website control panel and mobile apps Login , Register , Login Socila , Password Fergat , filters , user cards , likes , dislikes , albums , hidden album , view profile , rating rating , report user , matches , diary , profile stats , stories , audio call , hits chat, video call, mail notification, and chat notification such as mail history and dislike, site-only events. Delivery time 50 calendar days ...uploaded onto the App/Play store and help to do this please. Background -Data entry app that allows users to add entries locally (offline) and then these are uploaded to an remote online server via an API. This uses a https xml interface. Functions - PIN screen lock -Data entry - store data locally in a database, search, manipulate data (edit/copy/delete) -Upload data - send to remote server -Download data - sync/receive data from remote server -Settings page - username/password/updates/display Place provide examples of previous work. Please bid accordingly and state the expected timeframe to complete. Bids ideally from UK/EU due to timezone constraints. You will need to communicate as per GMT+0 timezone. Excellent and regular communication is a must. We will require co... I need a GOOD mockup in After Effects of a 3D looking trading card pack. Without the use of any plugins that cost money, you are free to use any plugin that is free to download and use. Now for the harder part: It need to be customizable to change the image of the pack, and I need an animation where the pack is opened, as realistic looking as possible. When the pack is opened there needs to be a placement inside for any type of card that I can change there and edit. The animation: Just imagine the pack being shown centered in screen, and a tear is made at the top and tearing the foil package in two, revealing a card inside. The pack is going to be foil looking. You may use any other tools like any 3D programs to make the animation and implement that video into after effects, that&#x.....order they are in, just that they are noted.) - A few of the videos contain two vans/trucks next to each other, both of them are idling. In those instances, please make a set of stills for each vehicle. - In a few cases, I have taken photographs of the trucks to ensure I had the license plate/address. You can use these images, and don't need to make stills for to replace those. You want to download all the video files first. I have tested the Google Drive preview, and you can't scrub through the footage very easily, and it takes A LOT longer to find the info. REALLY IMPORTANT: The images need to be stills from the video, not screenshots of the screen. A screenshot produces a file that is smaller than the size of the actual video. Here is how to take a video still:develop Storyboards for a Lesson on baking bread that will be computer-based. Your storyboard should be from 10-12 pages/screens/boards. As "head instructional designer," it should communicate about 3 issues as completely as possible to your hypothetical design team: The story Layout considerations on your screens and Basic screen types. Here is a template to use for 12 page Download 12 page you should use (Powerpoint). Note that I changed this template a little so that you can put your visuals for each page on a full screen, and use one other page of the PP for your specs of that page... So if your project had a total of 12 pages, it would take up 24 slides in this powerpoint... 2 pages of ppt, per 1 page of storyboard, make sense? Extra Credit: You can I need to download order details from website daily, BUT personalisation has been included on the card. 3) Download - for last minute purchase. Person buys blank version of the card and gets a download which they can print at home to take to their friend. All will have the same price point. I will supply all product files (ie the digital download and email versions of the cards) I need someone who can help build. I know all of this is possible as I have spoken to Spotify support but need someone (with similar experience) who can qui... To design a Backend Website NDA to be signed before starting the work Site layout - A Coupon Code Validating Website Should have Validator & Creator Login Creator to have Login of Company email id only. Validator to have company email ID only no gmail, yahoo, Hotmail, outlook to log in Cre... a system mail to be sent to creator specified email address if required Generate of MIS for all Valid Access & All Non-Valid access. Both Creator / Validator can check database with Name / PNR / Date / Coupon used / not used Database with travelers Mobile Number and email id t be maintained & checked Creator can re verify after traveler visit if the coupon has been checking by validator or not Download in excel. CSV or in PDF form or on-Screen View To build all this on Googlemerging with Connect. We were thinking to put bullet points on the back of the card. Our message: WITH ALL OUR SERVICES UNDER 1 ROOF, WE SAVE OUR CLIENTS MONEY!!! -Quick snapshot of all services -Goal: capture attention and make impact for retention -Leave behind that will "be seen while throwing" -QR code needed for website Main Points: -attached notes LA1CONNECT is one of the top Southwest premier electrical and communications construction, service, maintenance, and technology solutions contractors. - Locally owned and for over three decades, we've delivered state-of-the-art electrical and technology services throughout Louisiana. Our team handles projects of all sizes, from residential jobs to heavy commercial builds. We utilize progressive work deli... -Syracuse Swarm is seeking a team logo~ Syracuse Swarm is a Professional Kayak bass fishing team from central NY, competing in its inaugural year in the Kayak Fishing League (KFL). Let the word vomit begin -) We like the idea of the 4 wasps because they represent the 4 anglers competing during tournament. We also like the idea of the bass in the logo because that is the goal and what we are after~ Color scheme we are open to but get rid of the orange and maybe the wasps could have some gold in them? Hi! I want to use for audio only and need the following added into the existing audio player Seek +15 seconds Seek -15 seconds And download mp3. Thanks for bidding! Hello, I need to modify (or make a new one) an existing file excel that used to download data from Yahoo Finance and calculate some formulas. The file now is not working anymore, can you please fix it? In addition, I would like the file to download multiple stocks data simultaneously and then put the results of all the selected stocks in one tab only. Please see the file to understand. The data can be from Yahoo Finance or (even better) from Excel Stocks Data. Thanks Hi there, I need someone to change the clothing of 2 pre-made character rigs for Maya. I already have the rigs but their clothes don't fit the story I have to animate. I need someone to turn these ordinary cartoon man rigs, into cavemen using new clothing. I was thinking if you made them some sort of ...change the clothing of 2 pre-made character rigs for Maya. I already have the rigs but their clothes don't fit the story I have to animate. I need someone to turn these ordinary cartoon man rigs, into cavemen using new clothing. I was thinking if you made them some sort of animal skin clothes that would work best. I need this project completed asap. Thanks. It's free to sign up, type in what you need & receive free quotes in seconds
